Microsoft Word 2007

What is Word 2007?

Microsoft Word 2007 is a word processing program. This program helps you to create professional looking documents easily. A word processing program allows you to create different kinds of documents, such as resumes, reports, letters etc... You can kind of think of word processing like typing on a typewriter with added perks. You can manipulate the text on your screen, add pictures, correct any mistake that you made, and change the margins.

Microsoft Office Button

When Microsoft created Word 2007 they did a little redesigning. The Office Button replaces the old File Menu. Here is where you will find New, Open, Save, Save As, Print.

Quick Access Toolbar

Microsoft created this **Quick Access Toolbar** to be able to create a tool bar with buttons you click to perform frequently used commands. The Save, Undo, Redo/Repeat, and Quick Print buttons appear by default. You can add your favorite or most used commands to the **Quick Access Toolbar** by clicking the arrow next to the quick print. It will bring up a list of commands that you can choose from.

A **Ribbon** is an area that displays commands organized in groups and tabs. The Ribbon replaces the menus and toolbars found in previous versions of Word.

Command tabs: Appears by default whenever you open a Microsoft Office. You click on the tab to view its commands.

Contextual tabs: Appear when you perform a specific task and offer commands only to that task. For example if you insert a picture you will see a **Picture Tools** tab.

Group: To help you find commands easier they are arranged into groups of related commands.

Page Orientation

Reference Tab

Tabs are used in writing research papers: table of contents, citations and bibliography, footnotes, captions on pictures and charts and index.

Review Tab

A red wavy line under a **wrd** denotes a misspelled word. **A green line underneath the words denotes** a grammatical error. You can right click on the word and it will give you suggestions to fix the error.

Moving Text

- Highlight text to be moved
- Click the **Cut** button
- Put mouse where text is to be inserted and click once
- Click on **Paste** button

Copying Text

- Highlight text to be copied
- Click the **Copy** button
- Put mouse where text is to be inserted and click once
- Click on **Paste** button

NOTE: You can also right click on your selection and find the Cut, Paste & Copy commands.

Line Spacing

Spelling and Grammar Check

Click on the Review Tab and go to Spell Check **OR**

Click on Icon at the bottom of the page **OR**

Click on the Icon in your Quick Access Toolbar at the top of the page

Formatting Paragraphs

The **Paragraph** group allows you to change alignment of the text, indentation, line spacing and bullets.

| 1. Bullets Starts a bulleted list. Click the arrow to choose different bullet styles. | | | | |
|---|---|--|--|--|
| 2. Numbering | Starts a numbered list. Click the arrow to choose different numbering formats. | | | |
| 3. Multilevel List | Starts a multilevel list. Click the arrow to choose different multilevel styles. | | | |
| 4. Decrease Indent | Decreases the indent level of the paragraph | | | |
| 5. Increase Indent | Increases the indent level of the paragraph | | | |
| 6. Align Text Left | Aligns the text to the left | | | |
| 7. Center | Centers the text. | | | |
| 8. Align Text Right | Aligns the text to the right | | | |
| 9. Justify | Aligns the text to both the left and the right, adding extra spaces between words as necessary. This creates a clean look to the right and left side of the page. | | | |
| 10. Line Spacing | Changes the spacing between the lines of text. You can also customize the amount of space before and after a paragraph. | | | |
| 11. Shading | Color the background behind the selected cells or text in tables. | | | |
| 12. Borders Customize the borders of selected cells in tables. | | | | |
| 13. Sort | Alphabetize the selected text or sort numerical data. | | | |
| 14. Show/Hide ¶ | Shows or hides paragraph marks and other hidden formatting symbols. | | | |

Print Preview

Before you print your document we recommend that you do a **Print Preview**. This will allow you to make sure you don't need to adjust anything in your document.

- 1. Click the Office Button.
- 2. Click Print.

| 1. | Print | Sends your document to the printer | |
|-----|---|---|--|
| 2. | Options Opens the options dialog box in which you can change printing. | | |
| 3. | Margins | Allows you to change the margin sizes for your whole document | |
| 4. | Orientation | Switch between Portrait and Landscape | |
| 5. | Size | Choose paper size for the current section | |
| б. | Zoom | Brings up the Zoom Dialog b ox which allows you to zoom in and out of your document. | |
| 7. | 100% | Shows the document to 100% of the normal size | |
| 8. | One Page | Shows the whole page on the screen | |
| 9. | Two Page | Zooms the document so that 2 pages fit on the screen | |
| 10. | Show ruler | If checked will show you the rulers that are used to measure and line up objects. | |
| 11. | Magnifier | Turns the cursor into a magnifying glass which can be used to quickly toggle between 100% and Fit Whole Page zoom levels through clicking the document. | |
| 12. | Next Page | Moves you to the next page of your document | |
| 13. | Previous Page | Moves you to the previous page of your document. | |
| 14. | Shrink One Page | Attempt to shrink the document by one page by slightly reducing text size and spacing in the document. | |
| 15. | Close Print Preview | Exits you out of print preview. | |

Printing

You can access the Print command directly from Print Preview (Item #1 above) or
